

# Table of Contents

<i>Preface</i> .....	ix
<i>List of Contributors</i> .....	xi
<b>Chapter 1—Recovery Boilers in Kraft Pulp Mills</b> .....	<b>1</b>
HONGHI TRAN	
1.1. Introduction .....	1
1.2. The Kraft Process .....	1
1.3. Development History .....	4
1.4. General Characteristics of Kraft Recovery Boilers .....	6
1.5. Development Trends .....	8
1.6. Increased Efficiency and Power Production .....	10
1.7. Recovery Boiler Fuels .....	12
1.8. Environmental Impact .....	13
1.9. Safety .....	13
1.10. Summary .....	13
1.11. Acknowledgements .....	14
1.12. References .....	14
<b>Chapter 2—Recovery Boiler Chemistry</b> .....	<b>17</b>
MIKKO HUPA	
2.1. Introduction .....	17
2.2. Chemical Processes .....	17
2.3. Sodium and Sulfur Chemistry .....	18
2.4. Dust Formation .....	23
2.5. Chlorine and Potassium .....	26
2.6. Summary .....	28
2.7. Acknowledgements .....	28
2.8. References .....	28
<b>Chapter 3—Black Liquor Properties</b> .....	<b>31</b>
Wm. JAMES FREDERICK and MICHAEL BUCHANAN	
3.1. Introduction .....	31
3.2. Chemical Composition of Black Liquor .....	31
3.3. Analysis Methods for Black Liquor .....	33
3.4. Thermal and Transport Properties .....	36
3.5. Determining the Inorganic Content of Black Liquor .....	44
3.6. Solubility of $\text{Na}_2\text{CO}_3$ and $\text{Na}_2\text{SO}_4$ in Black Liquor .....	45

3.7. Heat Capacity and Enthalpy . . . . .	47
3.8. Surface Tension. . . . .	49
3.9. Thermal Conductivity. . . . .	50
3.10. Summary . . . . .	51
3.11. Nomenclature . . . . .	51
3.12. References . . . . .	52
3.13. Appendix . . . . .	54
<b>Chapter 4—Black Liquor Sprays. . . . .</b>	<b>59</b>
TERRY N. ADAMS	
4.1. Introduction . . . . .	59
4.2. Description of Black Liquor Spray Nozzles . . . . .	59
4.3. Typical Black Liquor Nozzle Operating Conditions . . . . .	64
4.4. Liquor Delivery System and Nozzle Flow Characteristics . . . . .	64
4.5. Mean Droplet Size and Size Distribution for Non-flashing Conditions. . . . .	67
4.6. Black Liquor Flashing . . . . .	71
4.7. Modeling the Impact of Black Liquor Sprays on Boiler Operation . . . . .	75
4.8. Practical Implications. . . . .	77
4.9. Acknowledgements . . . . .	77
4.10. Nomenclature . . . . .	78
4.11. References . . . . .	78
<b>Chapter 5—Black Liquor Burning Processes . . . . .</b>	<b>81</b>
MIKKO HUPA	
5.1. Introduction . . . . .	81
5.2. Overview of Black Liquor Droplet Burning. . . . .	81
5.3. Droplet Drying . . . . .	85
5.4. Devolatilization . . . . .	86
5.5. Char Burning . . . . .	87
5.6. Droplet Swelling. . . . .	89
5.7. Droplet Burning and Carryover . . . . .	93
5.8. Summary . . . . .	96
5.9. Acknowledgements . . . . .	96
5.10. References . . . . .	97
<b>Chapter 6—Char Bed Processes . . . . .</b>	<b>99</b>
THOMAS M. GRACE and HONGHI TRAN	
6.1. Introduction . . . . .	99
6.2. Char Bed Composition, Shape, and Structure . . . . .	99
6.3. Chemical Reactions in Char Beds. . . . .	105
6.4. Heat Transfer in Char Beds. . . . .	108
6.5. Smelt Formation and Transport. . . . .	109
6.6. Char Beds and Floor Tube Integrity. . . . .	114
6.7. Char Bed Modeling . . . . .	116
6.8. Char Bed Cooling . . . . .	118
6.9. Summary . . . . .	121
6.10. Acknowledgement . . . . .	121
6.11. References . . . . .	121

<b>Chapter 7—Recover Boiler Air Systems</b> .....	<b>125</b>
ANDREW K. JONES	
7.1. Introduction .....	125
7.2. Computer Modeling .....	125
7.3. Goals of a Well Designed Air System .....	126
7.4. Air Admission .....	126
7.5. Gas Flow Path .....	131
7.6. Summary .....	140
7.7. Acknowledgements .....	141
7.8. References .....	141
<b>Chapter 8 – Recovery Boiler Air Emissions</b> .....	<b>143</b>
MIKKO HUPA and HONGHI TRAN	
8.1. Introduction .....	143
8.2. Flue Gas Composition .....	143
8.3. Sulfur Gas Emissions .....	144
8.4. HCl Emissions .....	149
8.5. Nitrogen Oxide (NO <sub>x</sub> ) Emissions .....	149
8.6. Particulate Emissions .....	154
8.7. Heavy Metals Emissions .....	158
8.8. Practical Considerations for Recovery Boiler Emissions Optimization .....	159
8.9. Summary .....	160
8.10. Nomenclature .....	160
8.11. Acknowledgements .....	160
8.12. References .....	160
<b>Chapter 9 – Deposit Formation and Plugging</b> .....	<b>163</b>
HONGHI TRAN	
9.1. Introduction .....	163
9.2. Deposition Principles .....	163
9.3. Deposit Types .....	165
9.4. Deposit Morphology .....	168
9.5. Precipitator Ash .....	169
9.6. Deposit Chemistry .....	169
9.7. Deposit Melting Behavior .....	175
9.8. Deposit Growth .....	179
9.9. Deposit Hardening and Mechanical Strength .....	181
9.10. Deposit Colors .....	184
9.11. Occurrence of Plugging .....	185
9.12. Sootblowers and Deposit Removal .....	192
9.13. Plugging Prevention .....	192
9.14. Deposit Monitoring .....	193
9.15. Draft Loss and Degree of Plugging .....	194
9.16. Factors Affecting Fouling and Plugging .....	195
9.17. Chloride and Potassium Control .....	197
9.18. Summary .....	198
9.19. Nomenclature .....	198
9.20. Acknowledgements .....	199
9.21. References .....	199

<b>Chapter 10—Sootblowers and Deposit Removal</b> .....	<b>201</b>
HONGHI TRAN	
10.1. Introduction .....	201
10.2. Sootblowers .....	201
10.3. Interaction of Sootblower Jets with Tubes and Deposits .....	208
10.4. Deposit Strength and Removability .....	210
10.5. Determining Sootblowing Efficiency .....	215
10.6. Sootblowing Optimization .....	218
10.7. Deposit Removal by Thermal Shock .....	219
10.8. Low-pressure Sootblowing Technology .....	220
10.9. Sootblower Maintenance and Safety .....	221
10.10. Summary .....	222
10.11. Abbreviations .....	223
10.12. Acknowledgements .....	223
10.13. References .....	223
<b>Chapter 11—Recovery Boiler Corrosion Environments</b> .....	<b>225</b>
W. B. A. (SANDY) SHARP and HONGHI TRAN	
11.1. Introduction .....	225
11.2. Corrosion Principles .....	226
11.3. Alloying for Corrosion Resistance .....	227
11.4. Corrosivity of Flue Gases .....	227
11.5. Corrosivity of Fireside Deposits .....	230
11.6. Corrosion Environments in the Lower Furnace .....	230
11.7. Mid-furnace Corrosion Environments .....	237
11.8. Corrosion Environments at the Upper Furnace Waterwall Tubes, Screen Tubes, Roof Tubes and Nose Tubes .....	237
11.9. Superheater Corrosion Environments .....	241
11.10. Economizer, Precipitator and Stack Corrosion Environments .....	245
11.11. Waterside Corrosion Environments .....	245
11.12. Summary .....	246
11.13. Acknowledgements .....	246
11.14. References .....	247
<b>Chapter 12—Recovery Boiler Inspection and Maintenance</b> .....	<b>249</b>
DOUGLAS SINGBEIL	
12.1. Introduction .....	249
12.2. Codes and Standards .....	250
12.3. Principles of Inspection .....	250
12.4. Damage Mechanisms .....	252
12.5. Inspection Techniques .....	252
12.6. Inspection Planning .....	255
12.7. Inspection Scope .....	256
12.8. Safety and Boiler Access .....	257
12.9. Inspection and Maintenance .....	258
12.10. Summary .....	275
12.11. Abbreviations .....	275
12.12. Acknowledgements .....	275
12.13. References .....	275

<b>Chapter 13—Recovery Boiler Safety</b> .....	<b>277</b>
THOMAS M. GRACE	
13.1. Introduction .....	277
13.2. Overview of Recovery Boiler Explosions .....	277
13.3. Combustible Gas Explosions .....	280
13.4. Smelt-Water Explosions .....	285
13.5. Prevention of Smelt-water Explosions .....	291
13.6. Recovery Boiler Safety Programs .....	295
13.7. Summary .....	296
13.8. Acknowledgements .....	297
13.9. Editor's Notes .....	297
13.10. References .....	297
<b>Chapter 14—Recovery Boiler Design</b> .....	<b>299</b>
TERRY N. ADAMS and ANDREW K. JONES	
14.1. Introduction .....	299
14.2. Recovery Boiler Design .....	299
14.3. Peripheral Equipment .....	309
14.4. Summary .....	312
14.5. Acknowledgments .....	312
14.6. References .....	312
<b>Chapter 15—Automatic Control of Recovery Boilers</b> .....	<b>315</b>
TERRY N. ADAMS	
15.1. Introduction .....	315
15.2. Control Objectives .....	315
15.3. Parameters that Impact Automatic Control .....	317
15.4. Control Strategies .....	318
15.5. Blackout Control .....	320
15.6. Automatic Control Logic .....	321
15.7. Handling Load Variations .....	322
15.8. Other Features .....	322
15.9. Practical Applications .....	322
15.10. Conclusions .....	324
15.11. Acknowledgements .....	324
15.12. References .....	324
<b>Chapter 16—Recovery Boiler Material and Energy Balances</b> .....	<b>327</b>
HONGHI TRAN and THOMAS M. GRACE	
16.1. Introduction .....	327
16.2. Formulation Procedures .....	327
16.3. Material Balance .....	329
16.4. Energy Balance .....	334
16.5. Boiler Performance Calculations .....	341
16.6. Steam Production .....	343
16.7. Parametric Effects .....	344
16.8. Available Material and Energy Balance Programs .....	346
16.9. Summary .....	346

16.10. Acknowledgements ..... 347  
16.11. References ..... 347  
16.12. Appendices ..... 348  
*Index* ..... 355  
*Author Biographies* ..... 365
