

Subject Index

Technical Information Papers

This document was last updated August 29, 2024

A

Abrasion

Selection criteria for wet end ceramics, [0502-15](#)

Abrasion resistance

Selection criteria for wet end ceramics, [0502-15](#)

Absorption

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

Accessibility

Maintenance considerations in new construction and rebuilds, [0408-02](#)

Acoustic Emission

See Nondestructive Tests

Acrylic fibers

see Polyacrylics, Synthetic fibers

Additives

Techniques for running “WRA” (water resistant starch adhesive), [0304-46](#)

Adhesives

Buying, Storing, and Handling P.V.A. Adhesives Used on Folder Gluers and on Sheet Laminators, [0305-25](#)

Causes and corrections of common corrugator bonding problems, [0304-32](#)

Evaluating glue lap adhesive properties, [0304-16](#)

Procedure for setting up a raw material trial on the corrugator, [0304-01](#)

Starch adhesive preparation and distribution systems: housekeeping, [0304-06](#)

Starch adhesive trial, [0304-22](#)

Statistical process control of starch gelatinization temperature, [0304-14](#)

Statistical process control of starch viscosity, [0304-15](#)

Techniques for bonding modern high-performance liners, [0304-40](#)

Techniques for running “WRA” (water resistant starch adhesive), [0304-46](#)

Understanding wet strength: what are MRA, WRA, and WPA?, [0304-69](#)

Understanding and troubleshooting hot melt adhesives, [0304-74](#)

Using washup water as the vehicle in starch-based corrugating adhesive, [0304-44](#)

After dryers

Paper machine drying rate, [0404-07](#)

Agitation

Using washing water as the vehicle in starch based corrugating adhesive, [0304-44](#)

Agitators

Guidelines for side-entering stock agitators, [0420-13](#)

Air

Paper machine room ventilation guidelines, [0404-50](#)

Air balance

see Air, Materials balance

Air flow

Guidelines for evaluation of liquid ring vacuum pump performance, [0420-12](#)

Recommended minimum dryer pocket air requirements, [0404-17](#)

Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, [0404-24](#)

Sheet handling devices, [0404-44](#)

Air jets

Sheet handling devices, [0404-44](#)

Air permeability

Automated Scanning for Moisture Content and Air Permeability on Paper Machine Felts, [0502-21](#)

Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, [0404-20](#)

Air pollution

Collection and burning of concentrated noncondensable gases: regulations, design and operation, [0416-09](#)

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

Air staging

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

Alignment

Checking the parallel of corrugating rolls with “NCR” paper, [0304-62](#)

Alkali

Specific heat of caustic soda solutions, [0606-07](#)

Alkaline sulfite pulping

Boiling point rise of spent sulfite liquors, [0607-21](#)

Definitions of terms in the sulfite pulping process, [0607-25](#)

Density of aqueous sodium sulfite solution, [0607-18](#)

Density of milk of lime solution, [0607-05](#)

Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, [0607-07](#)

Sulfur burner gas strength volume, [0607-01](#)

Viscosities of various spent sulfite liquors at 26.7°C, [0607-22](#)

Alkalinity

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Alumina

Guidelines for Rotary Lime Kiln Refractory, [0416-27](#)

Ammonia

Solubility of sulfur dioxide, [0607-06](#)

Analysis

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Angle of slide

see Slide angle

Anilox coaters

In-line coating at the corrugator, [0304-39](#)

Anilox rolls

see Flexography, Printing cylinders

Ink metering systems for corrugated flexo presses,

[0306-09](#)

Anvil Wear

Troubleshooting the Die Cutting Section, [0305-39](#)

Approach flow systems

Headbox approach piping guidelines, [0404-54](#)

Ash

Chloride and potassium measurement and control in the pulping and chemical recovery cycle, [0416-15](#)

Drainage evaluation by mass measurement, [0502-12](#)

Chemical cleaning guide for press fabrics, [0404-65](#)

Atmosphere

Testing atmospheres simulating end use conditions,

[0808-05](#)

Attenuation

Headbox approach piping guidelines, [0404-54](#)

Auditing

Checklist for a properly planned project, [0408-01](#)

Automatic feeders

see Feeders

Automated Felt Scanner

Automated Scanning for Moisture Content and Air Permeability on Paper Machine Felts, [0502-21](#)

Automation

Industry 4.0 Lexicon, 1103-04

Availability

Definitions of black liquor recovery furnace availability,

[0416-02](#)

B

Backing Blade

Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, [0425-06](#)

Bacteria

Starch adhesive preparation and distribution systems: housekeeping, [0304-06](#)

Bags

Paper machine drying rate, [0404-07](#)

Bar Width Reduction (BWR)

see Product codes

Bar codes

see Product codes

Bases

see Hydroxides

Basis weight

Headbox approach piping guidelines, [0404-54](#)

Batch digesters

Guidelines for inspecting batch digesters, [0402-22](#)

Batch process

Measurement of dryer condensing rates (vertical separator method), [0404-18](#)

Bauxite

Guidelines for Rotary Lime Kiln Refractory, [0416-27](#)

Bearings

Corrugator bearing clearance checks and their impact, [0304-47](#)

Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, [0402-34](#)

Total indicated runout and its impact on combined board quality, [0304-56](#)

Design, monitoring and maintenance guidelines for Yankee dryer bearings, [0425-03](#)

Bearing failure

Design, monitoring and maintenance guidelines for Yankee dryer bearings, [0425-03](#)

Biocide

Using washing water as the vehicle in starch based corrugating adhesive, [0304-44](#)

Biomass

Performance test procedure for boilers using biomass as fuel, [0416-18](#)

Sampling procedures for biomass fuel for boiler performance testing, [0416-17](#)

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

Biomechanics

see Human factors

Bisulfites

Physical and chemical properties of magnesia-base pulping solutions, [0607-04](#)

Solubility of sulfur dioxide, [0607-06](#)

Solubility of sulfur dioxide in magnesium bisulfite solution, [0607-09](#)

Solubility of sulfur dioxide in saturated magnesium bisulfite solution, [0607-10](#)

Black liquor

Field welding of pin studs in black liquor recovery boilers, [0402-15](#)

Recommended test procedure for black liquor evaporators, [0416-11](#)

Recovery boiler performance calculation – short form, [0416-01](#)

Response to contamination of high purity boiler feedwater, [0416-05](#)

Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, [0402-18](#)

Black Oxide

Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, [0425-04](#)

Blade

Paper machine doctor recommendations, [0404-67](#)

Blade coaters

see also Coaters

In-line coating at the corrugator, [0304-39](#)

Blade holder

Paper machine doctor recommendations, [0404-67](#)

Bleach plants

Bleaching plant washer efficiency guide, [0606-23](#)

Bleached board

Paper machine drying rate, [0404-07](#)

Paper machine performance guidelines, [0404-47](#)

Bleaching

Boiling point rise of spent sulfite liquors, [0607-21](#)

Cotton in nonwovens, [1205-02](#)

Chlorine gas curve, [0606-02](#)

Definitions of terms in the sulfite pulping process,

[0607-25](#)

Density of aqueous sodium sulfite solution, [0607-18](#)

Density of chlorine gas, [0606-03](#)

Density of milk of lime solution, [0607-05](#)

Energy checklist: pulp mill, [0416-24](#)

Heat of vaporization of liquid chlorine, [0606-04](#)

Recommended pulp bleaching stage designation method,

[0606-21](#)

Relative enthalpy (heat content) of sodium hydroxide solutions, [0606-08](#)

Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions,

[0607-07](#)

Specific gravity and density of caustic soda solutions,

[0606-20](#)

Specific gravity of sodium chloride solutions, [0606-10](#)

Sulfur burner gas strength volume, [0607-01](#)

Viscosities of various spent sulfite liquors at 26.7°C,

[0607-22](#)

Viscosity of liquid chlorine [0606-05](#)

Viscosity of sodium hydroxide solutions, [0606-11](#)

Bleaching stages

see Bleaching

Blind-drilled rolls

see Vacuum rolls

Blistering

Addendum to *Corrugating Defect Terminology Manual* - defects related to the use of fingerless singlefacers, [0304-17](#)

Blow boxes

Sheet handling devices, [0404-44](#)

Blow-through steam

Recommended Dryer Differential Pressures, [0404-31](#)

Blowdown

see also Blowing

Blowing

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Board

Pilot paper and wet laid nonwoven machines, [0502-16](#)

Board caliper

see Thickness

Boiler feed water

see Boilers, Feedwater

Boiler tubes

Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, [0402-33](#)

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, [0402-31](#)

Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, [0402-13](#)

Boilers

Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, [0402-38](#)

Explanation of recovery boiler leak indications, [0416-23](#)

Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, [0416-07](#)

Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, [0402-36](#)

Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, [0416-08](#)

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, [0402-31](#)

Keys to successful chemical cleaning of boilers, [0416-06](#)

Performance test procedure for boilers using biomass as fuel, [0416-18](#)

Sampling procedures for biomass fuel for boiler

performance testing, [0416-17](#)

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Water treatment-related opportunities for energy conservation in a paper mill powerhouse, [0416-13](#)

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), [0416-26](#)

Bonding

Techniques for bonding modern high-performance liners, [0304-40](#)

Box compression

see Compression strength

Box flaps

see Flaps

Box machines

Troubleshooting a glue lap problem, [0304-10](#)

Box plants

see Converting plants

Boxes

Corrugated boxplant-list of potential hazards, [0301-01](#)

Critical properties to consider when unitizing, [0304-72](#)

High vacuum sheet dewatering, [0404-60](#)

Broke

Broke loss calculations, [0502-10](#)

Bronze

Guidelines for nondestructive examination of suction roll shells, [0402-19](#)

Weld repairs on new suction roll shells, [0402-17](#)

Burners

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

Burst testers

Calibration and maintenance of the burst tester, [0304-24](#)

Butt joints

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, [0402-31](#)

Butt welds

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, [0402-31](#)

C

CADCAM

CONEG

see Regulations

Cadmium

An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, [0304-58](#)

Calcination

Physical data of calcined kaolin-water suspensions, [0106-09](#)

Calcium base liquors

Solubility of sulfur dioxide, $\text{Ca}(\text{HSO}_3)_2$ solutions, [0607-07](#)

Calcium bisulfite

Solubility of sulfur dioxide, $\text{Ca}(\text{HSO}_3)_2$ solutions, [0607-07](#)

Calcium carbonate

Physical data of calcium carbonate-water suspensions, [0106-01](#)

Calcium hydroxide

Density of milk of lime solution, [0607-05](#)

Calculations

see Computation

Calibration

Basic guidelines for image analysis measurements, [0804-09](#)

Calibration and maintenance of the manually operated micrometer, [0304-30](#)

Calibration and maintenance of the burst tester, [0304-24](#)

Suggestions for developing a box plant quality manual, [0304-49](#)

Caliper

see Thickness

Canadian standard freeness

Interconversion of freeness, [0809-01](#)

Carbon steel

Inspection for cracking of composite tubes in black liquor recovery boilers, [0402-30](#)

Carbonates

Chloride and potassium measurement and control in the pulping and chemical recovery cycle, [0416-15](#)

Estimating the first melting temperature of fireside deposits in recovery boilers, [0416-12](#)

Physical data of calcium carbonate-water suspensions, [0106-01](#)

Cartridges

Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, [0425-06](#)

Cast iron

Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, [0420-14](#)

Castings

Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, [0402-25](#)

Caustic soda

see Sodium hydroxide

Causticizing

Energy checklist: pulp mill, [0416-24](#)

Material balance equations relating to digester requirements, [0418-02](#)

Centrifugal Cleaner

Introduction to centrifugal cleaners, [0508-10](#)

Ceramics

Selection criteria for wet end ceramics, [0502-15](#)

Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, [0502-19](#)

Certification

Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, [0402-33](#)

Chalk

see Calcium carbonate

Chambered Doctor Blade

Ink metering systems for corrugated flexo presses, [0306-09](#)

Charting

Short-run statistical process control: a basic charting method, [0304-70](#)

Statistical process control - procedures for charting warp, [0304-13](#)

Checklist

see Maintenance

Chemical Cleaning

Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, [0404-51](#)

Chemical preparation

Specific gravity and density of caustic soda solutions, [0606-20](#)

Specific gravity of sodium chloride solutions, [0606-10](#)

Chemical properties

Chlorine dioxide (ClO_2) safe storage and handling, [0606-30](#)

Fluoropolymer properties and applications in pulp and paper mills, [0402-37](#)

Magnesia-base pulping solutions, [0607-04](#)

Sodium chlorate (NaClO_3) safe handling and storage, [0606-31](#)

Chemical pulps

Boiling point rise of spent sulfite liquors, [0607-21](#)

Definitions of terms in the sulfite pulping process, [0607-25](#)

Density of aqueous sodium sulfite solution, [0607-18](#)

Density of milk of lime solution, [0607-05](#)

Solubility of sulfur dioxide, $\text{Ca}(\text{HSO}_3)_2$ solutions, [0607-07](#)

Sulfur burner gas strength volume, [0607-01](#)

Viscosities of various spent sulfite liquors at 26.7°C, [0607-22](#)

Chemical Recovery

Recausticizing material balance equations relating to digester requirements, [0418-02](#)

Chemicals

Material safety data sheets, what to look for - how to understand them, [0304-38](#)

Chemical cleaning guide for press fabrics, [0404-65](#)

Chests

see Stock chests

Chip silos

see Chip bins

Chlorides

Chloride and potassium measurement and control in the pulping and chemical recovery cycle, [0416-15](#)

Estimating the first melting temperature of fireside deposits in recovery boilers, [0416-12](#)

Chlorine

Chlorine gas curve, [0606-02](#)

Density of chlorine gas, [0606-03](#)

Heat of vaporization of liquid chlorine, [0606-04](#)

Viscosity of liquid chlorine, [0606-05](#)

Chlorine dioxide

Chlorine dioxide (ClO₂) safe storage and handling, [0606-30](#)

Specific gravity of sodium chloride solutions, [0606-10](#)

Chrome

Tests for corrugator roll wear, [0304-53](#)

Chromium

An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, [0304-58](#)

Yankee Dryer Thermal Spray Coating, [0425-09](#)

Clad-steel plate

see Plates

Classification

Classification of Paper, Board, Tissue, and Pulp Grades, [0404-36](#)

Clay

Kaolin clay pigment index, [0106-06](#)

Physical data of calcined kaolin-water suspensions, [0106-09](#)

Physical data of hydrous Kaolin-water suspensions, [0106-02](#)

Cleaners

Catalog of Stock Preparation Pilot Plants, [0502-20](#)

Cleaning

Cleaning anilox rolls: procedures and options, [0306-18](#)

Cleanup procedures for flexo folder gluer/rotary diecutters, [0305-33](#)

Daily, weekly, and monthly maintenance checklists, [0305-34](#)

Dryer fabric cleaning, [0404-38](#)

Housekeeping guidelines, [0305-32](#)

Keys to successful chemical cleaning of boilers, [0416-06](#)

Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, [0404-51](#)

Paper machine shower recommendations, [0404-61](#)

Post-fabrication cleaning of stainless steel in the pulp and paper industry, [0402-35](#)

Cleaning chemicals

see Cleansers

Cleansers

Keys to successful chemical cleaning of boilers, [0416-06](#)

Clogging

Nozzle maintenance and clogging, [0420-15](#)

Clothing

see Felts, Machine clothing

Coating

Kaolin clay pigment index, [0106-06](#)

Coating color

see Color

Coating thickness

Tests for corrugator roll wear, [0304-53](#)

Coatings

Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, [0402-32](#)

Tests for corrugator roll wear, [0304-53](#)

Coefficient of friction

see Friction factor

Combination Metering System

Ink metering systems for corrugated flexo presses, [0306-09](#)

Combined boards

Common curtain coating problems: causes, detection, and correction, [0304-26](#)

Obtaining off the corrugator for use in statistical process control procedures, [0304-12](#)

Total indicated runout and its impact on combined board quality, [0304-56](#)

How to Minimize Rolling Scores in Diecutting Operations, [0304-64](#)

Compressibility

Objective Determination of the Haptic Properties of Tissue Products, [0808-07](#)

Compression

Corrugated caliper: why is it so important?, [0304-04](#)

Compression resistance

see Compression strength

Compression strength

Corrugated caliper: why is it so important?, [0304-04](#)

Obtaining a combined board caliper off the corrugator for use in statistical process control procedures, [0304-12](#)

Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, [0304-11](#)

Computation

Paper machine drying rate, [0404-07](#)

Computer-assisted

see CAD/CAM

Concentration

Best Practices for Consistency Measurement, [1101-07](#)

Concentricity

Total indicated runout and its impact on combined board quality, [0304-56](#)

Condensate

Application of dryer bars, [0404-35](#)

Condensates

Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, [0402-36](#)

Measurement of dryer condensing rates (continuous method), [0404-03](#)

Measurement of dryer condensing rates (vertical separator method), [0404-18](#)

Stripping of kraft pulping process condensates: regulations, design and operation, [0416-10](#)

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Water treatment-related opportunities for energy conservation in a paper mill powerhouse, [0416-13](#)

Yankee dryer steam condensing rates, [0404-49](#)

Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, [0425-04](#)

Condensation

Dryer condensing rates (batch method), [0404-02](#)

Dryer condensing rates (continuous method), [0404-03](#)

Condensing rates

see Condensation

Conditioning

Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, [0404-51](#)

Testing atmospheres simulating end use conditions, [0808-05](#)

Conductivity

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Confined Space

Improving safety training – a hands on approach, [1502-01](#)

Conical refiners

Conical refining intensity, [0508-07](#)

Conservation

Paper Machine Water Efficiency, [0502-22](#)

Consistency

Drainage evaluation by mass measurement, [0502-12](#)

Guidelines for Retention Measurements, [0502-13](#)

Generalized method for determining the pipe friction loss of flowing pulp suspensions, [0410-14](#)

Optimum consistency for pumping pulp, [0410-15](#)

Best Practices for Consistency Measurement, [1101-07](#)

Construction materials

Sodium chlorate (NaClO₃) safe handling and storage, [0606-31](#)

Consumption

Paper Machine Water Efficiency, [0502-22](#)

Contact bearings

see Bearings

Contact technique

Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, [0402-33](#)

Container boards

Friction -- slide angle, [0304-34](#)

Contaminants

see Impurities

Contamination

see Pollution control

Continuous digesters

Guidelines for inspection of continuous digesters and impregnation vessels, [0402-27](#)

Contraction

Flow from a 45° slice, [0410-03](#)

Flow from a nozzle (slice) with inclined upper lip, [0410-04](#)

Flow from a vertical slice, [0410-02](#)

Control charts

see Charting

Control systems

Industry 4.0 Lexicon, 1103-04

Short-run statistical process control: a basic charting method, [0304-70](#)

Conversion factors

Units of measurement and, [0800-01](#)

Converting factors

Moisture content of paper: terminology and conversion, [0808-02](#)

Converting plants

Boxplant quality measurement: why test?, [0304-02](#)

Corrugated boxplant - list of potential hazards, [0301-01](#)

Machinery considerations and selection, [0305-06](#)

Coolers

Guidelines for Rotary Lime Kiln Refractory, [0416-27](#)

Copper

The role of copper in a printing ink, [0304-61](#)

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Copper sulfate

Tests for corrugator roll wear, [0304-53](#)

Cores

Determination of winder sets per reel, [0502-02](#)

Reel diameter for various reel spool and roll core sizes, [0502-03](#)

Correlation

QCS Dynamic Sensor Correlation Sampling Method, [1101-04](#)

Moisture Dynamic Correlation Method, [1101-05](#)

Corrosion

see also Corrosion inhibitors

Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, [0402-38](#)

Estimating the first melting temperature of fireside deposits in recovery boilers, [0416-12](#)

Fluoropolymer properties and applications in pulp and paper mills, [0402-37](#)

Guide to the use of stainless steel pipe specifications, [0402-24](#)

Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, [0402-03](#)

Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, [0402-36](#)

Guidelines for inspecting batch digesters, [0402-22](#)

Guidelines for inspection of continuous digesters and impregnation vessels, [0402-27](#)

Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, [0402-28](#)

Guidelines for nondestructive examination of suction roll shells, [0402-19](#)

Nozzle maintenance and clogging, [0420-15](#)

Post-fabrication cleaning of stainless steel in the pulp and paper industry, [0402-35](#)

Ultrasonic technician performance test for boiler tube thickness measurement, [0402-21](#)

Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, [0402-18](#)

Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), [0416-26](#)

Corrosion inhibitors

Keys to successful chemical cleaning of boilers, [0416-06](#)

Corrosion prevention

Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, [0402-32](#)

Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, [0402-03](#)

Corrugated boards

The role of copper in a printing ink, [0304-61](#)

Critical properties to consider when unitizing, [0304-72](#)

Important quality parameters of a printing ink, [0304-59](#)

Obtaining caliper off the corrugator for use in statistical process control procedures, [0304-12](#)

Statistical process control friction-slide angle, [0304-34](#)

Techniques to minimize twist warp, [0304-50](#)

Warp in corrugated board, [0304-07](#)

Corrugated boxes

see Boxes, Corrugated boards

Corrugated containers

see Boxes, Corrugated board, Folder gluers, Die cutters

Corrugated medium

An alternative method for designating flute sizes, [0302-04](#)

Corrugating

An alternative method for designating flute sizes, [0302-04](#)

Corrugating adhesives

see Adhesives

Corrugating machines

Checking the flute depth of corrugating rolls, [0304-75](#)

Checking the parallel of corrugating rolls with "NCR" paper, [0304-62](#)

Conducting a corrugator temperature audit, [0304-65](#)

Corrugator bearing clearance checks and their impact, [0304-47](#)

Impact of doublebacker hot plate level on board quality and how to measure it, [0304-66](#)

Improved techniques to measure corrugator glue machine meter gaps, [0304-68](#)

Prevention of score cracking in a box plant, [0304-37](#)

Starch viscosity in corrugating adhesives, [0304-15](#)

Tests for corrugator roll wear, [0304-53](#)

Corrugating medium

Causes and corrections of common corrugator bonding problems, [0304-32](#)

Edge crush test (ECT): its relationship to box compression and its derivation from containerboard edge stiffness, [0304-09](#)

Paper machine performance guidelines, [0404-47](#)

Paper machine drying rate, [0404-07](#)

Procedure for setting up a raw material trial on the corrugator, [0304-01](#)

Splicer defects and cures, [0304-31](#)

Corrugating plants

see Operations

Corrugating rolls

see Rolls

Corrugator-double backer

see Corrugating machines

Water vapor

Paper machine room ventilation guidelines, [0404-50](#)

Waterside cracking

Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, [0402-38](#)

Wax

Common curtain coating problems: causes, detection, and correction, [0304-26](#)

Wear resistance

see Abrasion resistance

Web breaks

Guidelines for Tension During Web Conveyance and for Winding, [0200-01](#)

Web tension

Guidelines for Tension During Web Conveyance and for Winding, [0200-01](#)

Webs

see also Paper webs

Guidelines for Tension During Web Conveyance and for Winding, [0200-01](#)

Weight

Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, [0404-20](#)

Procedure for utilizing statistical control techniques to monitor the tare weight of a run of boxes, [0304-35](#)

Weight of newsprint rolls, [0502-11](#)

Weirs

Weirs and flumes, [0410-10](#)

Welding

Guide to the use of stainless steel pipe specifications, [0402-24](#)

Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, [0402-03](#)

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, [0402-31](#)

Guidelines for inspection of continuous digesters and impregnation vessels, [0402-27](#)

Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, [0402-25](#)

Field welding of pin studs in black liquor recovery

boilers, [0402-15](#)

Weld repairs on new suction roll shells, [0402-17](#)

Wet bulb temperature

Relative humidity tables, [0808-06](#)

Wet ends

Drainage evaluation by mass measurement, [0502-12](#)

Forming section monitoring, [0502-14](#)

How to prevent score cracking in a box plant, [0304-37](#)

Selection criteria for wet end ceramics, [0502-15](#)

Headbox approach piping guidelines, [0404-54](#)

Wet felts

see also Felts

Wet presses

Determination of water removal by, [0404-01](#)

Wet pressing

Terminology for high temperature pressing, [0404-48](#)

Wet strength

Understanding wet strength: what are MRA, WRA, and WPA?, [0304-69](#)

Wet-laid nonwovens

Pilot paper and wet laid nonwoven machines, [0502-16](#)

White liquors

Recausticizing material balance equations relating to digester requirements, [0418-02](#)

White liquor mud

Recausticizing material balance equations relating to digester requirements, [0418-02](#)

White water

Drainage evaluation by mass measurement, [0502-12](#)

Guidelines for Retention Measurements, [0502-13](#)

Flow determination by chemical method, [0410-09](#)

Weirs and flumes, [0410-10](#)

Width

Weight of newsprint rolls, [0502-11](#)

Winding

Guidelines for Tension During Web Conveyance and for Winding, [0200-01](#)

Wire

Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, [0502-19](#)

Wire Pits

Headbox approach piping guidelines, [0404-54](#)

Williams freeness

Interconversion of freeness, [0809-01](#)

Winders

Determination of winder sets per reel, [0502-02](#)

Wiper Roll

A guide to proper wiper roll selection for flexographic printing in the corrugated box industry, [0306-20](#)

Ink metering systems for corrugated flexo presses, [0306-09](#)

Wiperroll

see Flexography

Wood chips

see Chips

Wood containing papers

see Mechanical papers

Wood free papers

Paper machine drying rate, [0404-07](#)

Work place

see Human factors

Working conditions

see Environments

Wound rolls

Reel diameter for various reel spool and roll core sizes, [0502-03](#)

TAPPI Roll number for inventory/tracking systems and bar codes, [1004-01](#)

Wrinkles

Guidelines for Tension During Web Conveyance and for Winding, [0200-01](#)

Writing papers

Paper machine drying rate, [0404-07](#)

X-Y-Z

Yankee cylinders

see Yankee dryers

Yankee driers

Design, Operation, Performance Evaluation and Inspection guidelines for Yankee hood systems, [0425-02](#)

Yankee dryers

Design, monitoring and maintenance guidelines for Yankee dryer bearings, [0425-03](#)

Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, [0425-06](#)

Guidelines for routine periodic inspection and testing of cast iron Yankee and MG dryers, [0425-01](#)

Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, [0425-04](#)

Guidelines for usage of MAP on raw Yankee surfaces, [0425-05](#)

Safe and Reliable Start-Up and Shut-Down of Yankee Hood Air Systems, [0425-07](#)

Techniques for nip impressions, [0404-46](#)

Yankee dryer steam condensing rates, [0404-49](#)

Guidelines for the In-Service Detection of Acoustic Emission Indications in Yankee Dryers, [0425-08](#)

Yankee Dryer Thermal Spray Coating, [0425-09](#)

Safe Entry into a Yankee Dryer, [0425-10](#)

Yankee Grinding

See Grinding
